Tu, Jennifer, James and Jim,

Dan England from the City of Modesto informed me this morning that the city is going to construct a new City Hall building in Modesto between G and H Streets and 9th and 10th Streets. I have reviewed the map for the Halfords Plume as well as the figure I have showing the Elwoods Plume and I do not see any impact on our wells but wanted to inform and check with you.

Dan, there is a well referred to as 04 (see attached figure) that is on 10th Street between G and H. According to my records this is a City of Modesto drinking water supply well and is not ours.

Based on my review the city will have no impact on our wells - please let me know if you have different information and do not agree. Thank you.
